4. Client Delivery Guidelines for AI Interpretation

When delivering these syntheses to beginner clients, follow these three rules:

1. **Translate the Two Roles:** Name the two parts of the person's life (e.g., "Your emotional safety needs [Moon] and your drive to get things done [Mars]").
2. **Describe the Dynamic:** Explain how they interact using the aspect metaphor (e.g., "They are in an opposition, which means they feel like two sides sitting across a table on a see-saw").
3. **Give a Practical Takeaway:** Close with a concrete behavioral suggestion rather than abstract astrological theory (e.g., "When you feel torn between holding back and reacting, taking a pause to name what you need helps keep both sides balanced").
